

ANNEX 3

DEFINITION OF SYNTHETIC FIBRES INDUSTRY FOR THE PURPOSES OF THE MULTISECTORAL FRAMEWORK

The synthetic fibres industry is defined, for the purposes of the multisectoral framework, as:

- extrusion/texturisation of all generic types of fibre and yarn based on polyester, polyamide, acrylic or polypropylene, irrespective of their end-uses, or
- polymerisation (including polycondensation) where it is integrated with extrusion in terms of the machinery used, or
- any ancillary process linked to the contemporaneous installation of extrusion/texturisation capacity by the prospective beneficiary or by another company in the group to which it belongs and which, in the specific business activity concerned, is normally integrated with such capacity in terms of the machinery used.
